PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building scalable web applications, logistics platforms, analytics systems, and real-time communication applications using React.js, Node.js, Express.js, Java, and Spring Boot. Experienced in designing scalable RESTful APIs, microservices, RBAC systems, and high-performance backend services using PostgreSQL, MySQL, MongoDB, and Redis. Skilled in database optimization, caching strategies, authentication systems, frontend architecture, scalable system design, Dockerized deployments, Linux server management, and basic AWS services. Strong understanding of Data Structures, Algorithms, OOP, DBMS, OS, and scalable system design principles.

CORE COMPETENCIES

Scalable Backend Development, REST API Design, Microservices Architecture, Full-Stack Web Development, Database Optimization, Redis Caching, Authentication & RBAC, Real-Time Communication, System Design Fundamentals, Performance Optimization, Query Optimization, Scalable Architecture, Dockerized Deployments, Linux Server Management, AWS Fundamentals

SKILLS

Frontend

HTML, CSS, JavaScript, TypeScript, React.js, Redux, Redux Toolkit, React Native, Material UI, Bootstrap, Tailwind CSS

Backend

Node.js, Express.js, Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices Architecture

Databases & Caching

MongoDB, MySQL, PostgreSQL, Redis, SQL, Sequelize ORM

DevOps & Cloud

Docker, CI/CD, Linux, AWS (Basic Services), Git, GitHub, Postman

Testing

Jest, React Testing Library, Vitest

Computer Science Fundamentals

Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design, Authentication, RBAC, JWT Authentication, Query Optimization, Socket.io, Real-Time Communication, Database Design, Caching Strategies

EXPERIENCE

Full Stack Developer, Lavinstar Logistics Pvt Ltd

Nov 2024 — Present

Building scalable logistics and freight management applications using React.js, Node.js, Express.js, Java, Spring Boot, MongoDB, MySQL, PostgreSQL, and Redis.

- Developed scalable Spring Boot microservices and backend systems for freight and shipment lifecycle management supporting high-volume logistics workflows
- Designed and developed 20+ RESTful APIs for freight pricing, shipment tracking, and operational management systems
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) systems for secure enterprise workflows
- Optimized PostgreSQL/MySQL queries, indexing strategies, and MongoDB schemas improving backend performance and reducing API response times
- Integrated Redis caching for high-frequency APIs reducing database load and improving reporting dashboard performance by 25%

- Collaborated with frontend and business teams to deliver scalable and maintainable enterprise-grade logistics solutions
- Worked with Dockerized deployments and Linux-based development environments for backend service management

Technologies: React.js, Node.js, Express.js, Java, Spring Boot, MongoDB, MySQL, PostgreSQL, Redis, Docker, Microservices

Member of Technical Staff, AndGate Informatics

Apr 2024 — Nov 2024

- Developed scalable frontend applications using React.js, Redux Toolkit, TypeScript, and Material UI for enterprise-grade workflows
- Built reusable and responsive UI components using Tailwind CSS, HTML, CSS, and JavaScript improving development efficiency
- Integrated REST APIs and implemented complex frontend business workflows for enterprise applications
- Optimized frontend rendering and component structure improving application maintainability and performance

Technologies: React.js, Redux Toolkit, TypeScript, Material UI, Tailwind CSS

Software Engineer, Compunnel Inc

Sep 2022 — Apr 2024

- Designed and developed scalable web applications using React.js, Node.js, Express.js, Redux, and MySQL
- Built reusable frontend components and backend APIs improving maintainability and application scalability
- Optimized frontend rendering and backend API integration for better user experience and performance
- Wrote unit and integration test cases using Vitest and React Testing Library maintaining high test coverage standards
- Collaborated with cross-functional teams to deliver scalable and production-ready enterprise applications

Technologies: React.js, Node.js, Express.js, Redux, MySQL, Vitest

Associate Consultant Frontend Development, Oodles Technologies

Dec 2021 — Aug 2022

- Developed reusable frontend components using React.js and modern JavaScript for enterprise applications
- Integrated REST APIs and managed frontend-backend communication workflows
- Worked directly with clients to gather requirements and deliver scalable feature enhancements
- Improved frontend responsiveness and user experience across multiple client projects

Technologies: React.js, JavaScript, REST APIs

UI Developer, Valuefy Solutions

May 2021 — Oct 2021

- Developed responsive frontend interfaces using React.js, HTML, CSS, and JavaScript
- Integrated APIs and collaborated with backend teams for workflow implementation
- Improved application responsiveness and cross-browser compatibility

Technologies: React.js, HTML, CSS, JavaScript

CURRENT PROJECTS

Cargostar.io – Freight Quote Management Platform

- Developed scalable backend services and RESTful APIs for freight quote management supporting Air and Ocean shipment workflows
- Integrated multiple logistics providers including LFS, WWEX, ShipRite, and ExFreight for automated freight rate aggregation
- Built APIs to process and normalize freight pricing data from multiple third-party providers
- Optimized backend processing, caching strategies, and database queries for high-volume logistics operations
- Designed scalable backend workflows for shipment lifecycle and quote management systems

Reporting Metrics Dashboard

- Engineered backend services and analytics APIs for logistics reporting and shipment performance monitoring
- Developed APIs for job profitability analysis, operational reporting, and analytics dashboards
- Implemented Role-Based Access Control (RBAC) systems for secure access management
- Improved reporting API response times by 25% using Redis caching, query optimization, and indexing strategies
- Designed scalable reporting architecture for operational and financial analytics workflows

Onivas – Insurance Management Platform

- Developed customer-facing and admin insurance management platforms using React.js and Redux Toolkit
- Built reusable frontend architecture and scalable UI components improving maintainability
- Developed backend APIs using Spring Boot for insurance workflow management
- Integrated REST APIs and authentication systems for secure customer operations
- Maintained 80%+ frontend test coverage using Jest and React Testing Library

Serviceo Mobile App – Internal Communication Chat Application

- Developed a real-time communication mobile application using React Native, Node.js, Express.js, and Socket.io
- Implemented live messaging, notifications, authentication, and real-time communication workflows
- Built backend APIs and real-time synchronization systems supporting concurrent user communication
- Integrated Socket.io for live messaging and notification delivery systems

ACHIEVEMENTS

- Built scalable logistics and analytics platforms supporting high-volume shipment workflows and operational reporting systems
- Improved analytics API response times by 25% using Redis caching, SQL optimization, and indexing strategies
- Maintained 80%+ frontend test coverage using Jest and React Testing Library
- Developed scalable REST APIs and backend services for enterprise-grade logistics and analytics platforms

EDUCATION

Babu Banarasi Das University, Master of Computer Applications (MCA)	2018 — 2020
Babu Banarasi Das University, Bachelor of Computer Applications (BCA)	2015 — 2018
